

Welcome to Toyonaka City's Web Site

Thank you very much for visiting our web site.

With the geographical benefit of a gently rolling land that is situated near the Osaka Metropolis, Toyonaka has long been developed as a high-quality residential town.

It is also a place with easy access, where highways and railways cross, and borders the Osaka International Airport. Universities and other educational facilities are also located here.

To utilize these characteristics, Toyonaka city has developed 'The Third Toyonaka Comprehensive Plan', which will be completed by 2020.

The fundamental concept of the plan is to create a community, which leads its citizens to the world and the future. Here the citizens, companies and local government are working together to build a community where every one can live happily with close ties.

The social framework of Japan has been greatly changed by such factors as a rapid progress in aging, a declining birth rate and an increase in global environmental problems. We would like to continue responding to the needs of citizens and work together to make Toyonaka a lively and attractive community.

A Message from the Mayor KEIICHIROU ASARI
